

Social Narratives / Economic Realities

Policy Turbulence and the U.S. Outlook

Focus on Silicon Valley

Christopher Thornberg, PhD

Founding Partner, Beacon Economics

June 2025

Beacon Economics

Economic research firm founded in 2006 with a commitment to letting the *data* determine the *answer*.

Today's Presentation

- What we *think* is happening in our economy (our social narrative or “lived experience”)
- What is *actually* happening in our economy (our objective statistical reality)
- It is the combination of the two that drives the forecast: Narratives drive choices, while economics determines outcomes.

Good choices and smart policies start with the correct narrative.

Survey: The U.S. economy has a 64% chance of entering a recession this year

Written by [Sarah Foster](#), Edited by [Amy Sims](#)

Published on January 04, 2023 | 5 min read

Risks are rising—but not for the reasons you may think...

WSJ Recession Probability
Chance of US entering a recession in the next 12 months

Things aren't as bad as you think

- Household and business finances remain solid
- Most policy changes more smoke than fire
- Tariff impacts manageable at reasonable levels

Things are worse than you think

- US Economy is overheated, driven by government deficits and asset bubbles
- Reliant on global capital inflows to fund excess spending

What could cause a recession?

- Standard Story: Policy turbulence is the final straw
- Our View: Policy turbulence could pop the bubble, but recession only comes when household finances hit

Where next? Inflate, Deflate or Pop?

- Current politics: throw more fuel on fire
- Fed between a rock and hard place of their own making

Growth Solid Coming Into 2025

Figure 7. Assessment of own financial well-being, local economy, and national economy (by year)

Note: Among all adults. For each series, the responses presented represent the most favorable two outcomes on a four-point scale.

The Pandemic “Depression”?

Pandemics do not cause depressions.

- Lost Output during Pandemic: \$850 Billion
- Stimulus deployed: \$6 trillion
- Efforts supported by \$5 trillion in QE

The Stimulus Multiplier

- Initial stimulus \$50k per household
- Asset prices: \$200K more in net worth
- 26% increase in average net worth

Computers, peripherals, and parts	216	6.6%

Household Finance: Record Strong

Real Disposable Income

Average Net Worth Per Household (\$000s)

**From Pre-Pandemic:
+\$335K, +35%**

Too Strong?

Household Savings Rate (% DPI)

Consumer Spending Share GDP

An Over-Consumption Problem...

US Trade Deficit (\$Bil, Real)

US Current Account Deficit as % of GDP

The Federal Deficit

Deficits and Unemployment

Federal Deficit / % of GDP

Deficit Closing?

\$15,500 per household per year

- Higher Taxes: 8% of Household Disposable Household Income
- Reduced Spending: 25% of total current Fed expenditures

The Wealth / Income Mirage

Household Savings as % of DPI

Household Debt as % of GDP

Who is Paying the Bills?

Net Inflows of Portfolio Investment
(\$Billions, SAAR)

U.S. Net International Investment
Position \$Billions

Chasing Yield, Not Value

Real Value \$US (Broad Index)

US Equity Market Capitalization as Share of Global Total

Powell's Other Legacy; Asset Bubbles

Shiller Stock Market Price Earnings Ratio

The Recent Reactions to Turbulence

S&P 500 Daily Close

10 Year Treasury Rate (%)

Dollar Index

Where is the Fed?

The Federal Reserve's False Narrative

- US inflation due to some exogenous shock
- Inflation is now being driven by inflation expectations
- Inflation is causing substantial harm to American households
- The Fed must fight inflation and it is worth the loss of some jobs / higher unemployment

The Narrative / Reality Gap

	Q4 12	Q4 16	Q4 20	Q4 24
	Obama	Trump	Biden	Trump
Real GDP Growth YoY Gr	1.6%	2.2%	-1.0%	2.5%
Unemployment Rate	7.8%	4.8%	6.8%	4.1%
Real Per Capita DPI	\$42,342	\$43,846	\$49,476	\$51,637
Household Debt (% GDP)	84.5%	77.9%	77.5%	70.0%
Household Net Worth (% GDP)	413.9%	469.3%	562.3%	539.5%
UM: Consumer Sentiment	79.4	93.1	79.8	72.1
Federal Deficit % GDP	-6.5%	-3.1%	-16.2%	-6.9%
Federal Debt: % GDP	100.1%	104.6%	125.7%	121.9%
Current Account (% GDP)	-2.3%	-2.0%	-3.3%	-4.0%
Net Int Investment (% GDP)	-27.8%	-43.3%	-66.7%	-88.3%
\$Dollar (Broad Real)	87.9	108.0	105.7	119.5
Shiller P/E Ratio	21.24	27.08	32.51	37.22

Growing Risks

Economic Momentum to Slow

- Policy turbulence slowing decision making
- Tariff hit on some sectors

Turbulence threatening capital inflows

- Important #s: The \$US, asset prices, 10 Year Bond
- Recession starts when / if rate hikes hit household finances

California: Focused on the wrong issues

- Housing supply, not affordability
- Labor supply, not income inequality

The Bay Area?

- Tech suffering from its own success
- Housing supply can fix office / downtowns

The real issue? The Narrative

- Politics aim to intensify imbalances rather than reduce them
- How will American's react when they are forced to confront reality?
